Equipa

Carla Maria Cadete Martins Moita Brites
Bruna Filipa Camilo Carbas
Maria Do Carmo Martins Serrano
Maria Alexandra Campos Seabra Pinto
Victor Manuel Coelho Barros

Resumo

The project has been conceived to promote the culture of grain legumes in Europe by identifying priority issues currently limiting grain legume cultivation and devising solutions in term of novel varietal development, culture practices, and food uses. To achieve this, we will be harnessing the leading laboratories and associating a network of plant breeders and agronomists spanning the major areas of legume cultivation. Our network will also include representatives of the food processing chain dealing with grain legumes, and economic and life cycle assessment expertise. The project will be conceived to complement the activities in progress in major national projects and other European projects.
